

Step 1: Read the statement

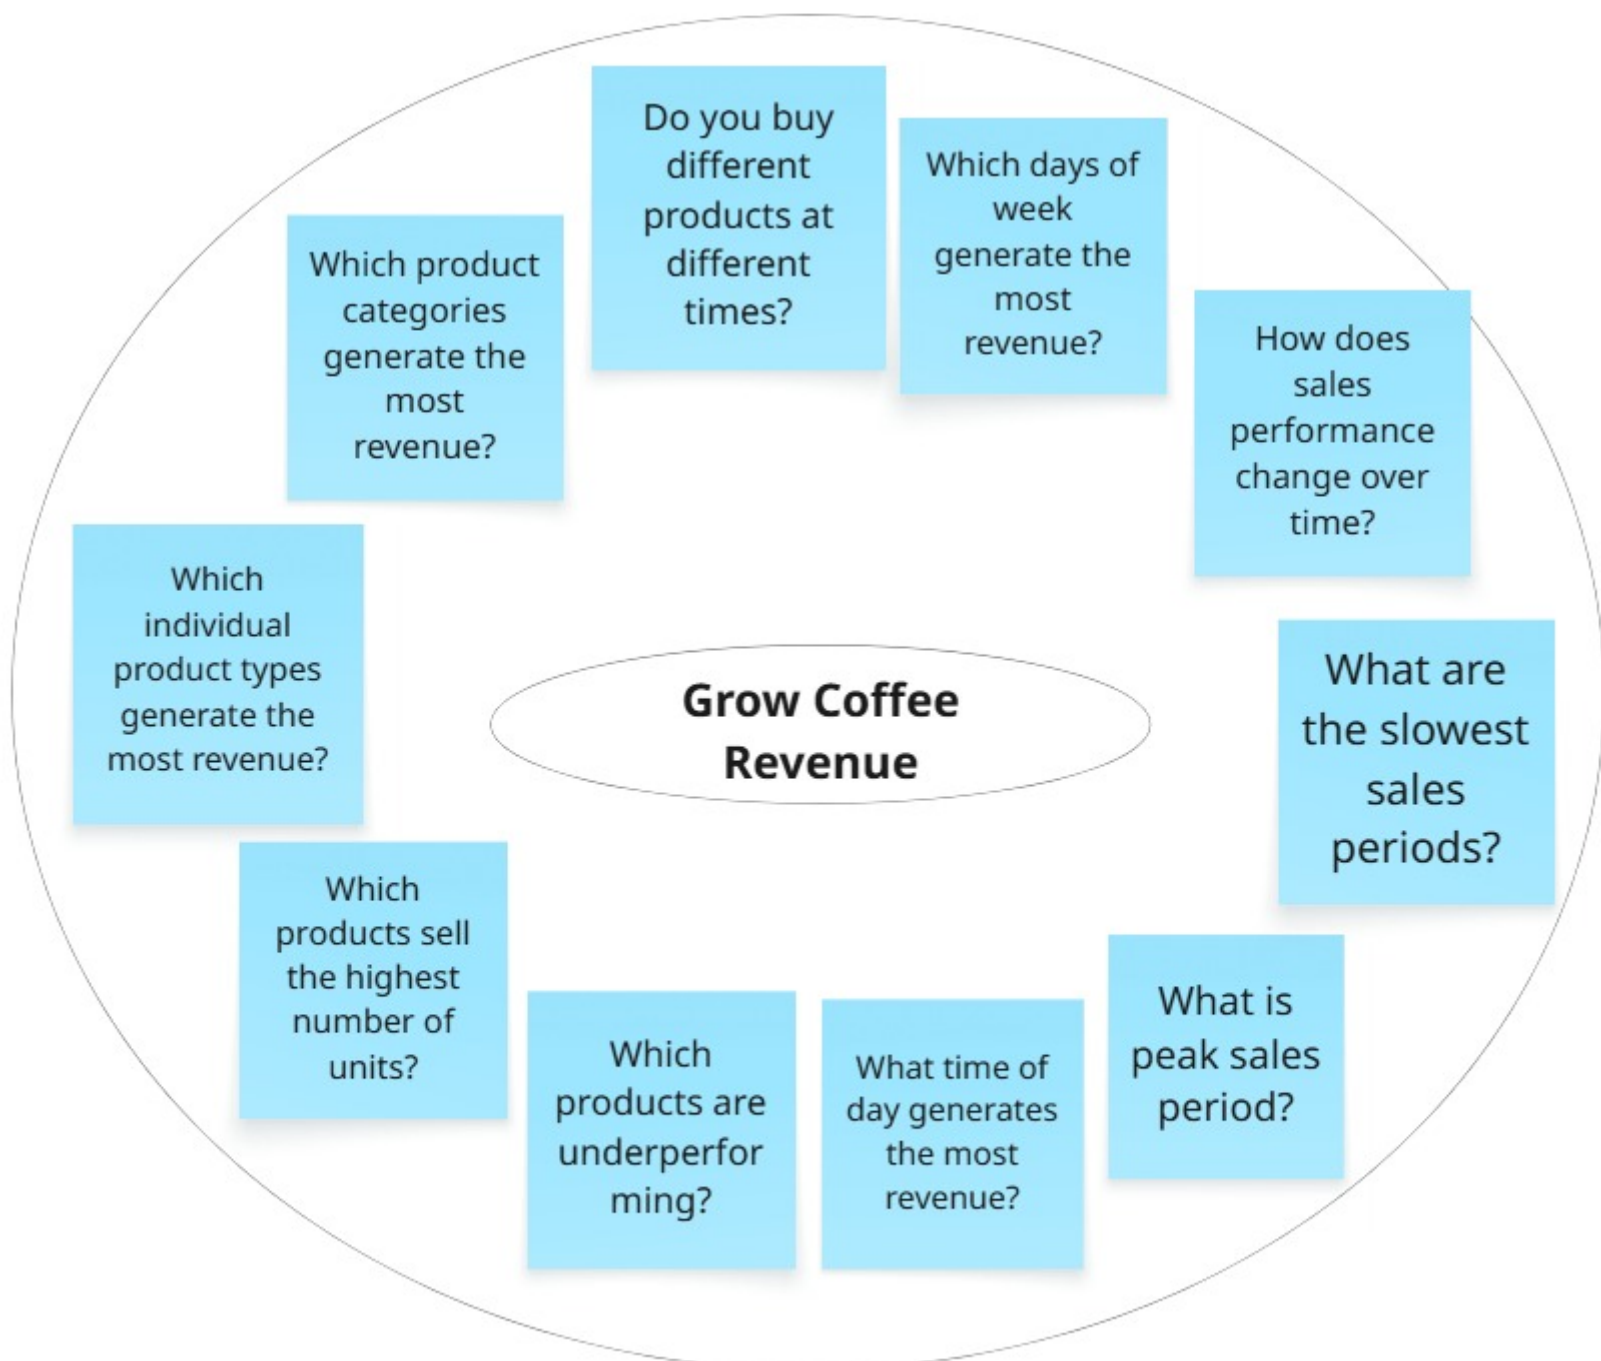

CASE STUDY:

You have been provided with a dataset titled “Bright Coffee Shop Sales”, which captures daily transactional information from a coffee shop. The business has recently appointed a new CEO whose mission is to grow the company’s revenue and improve product performance. Your role, as a Junior Data Analyst, is to extract actionable insights from historical data and prepare a presentation to assist the CEO in decision-making

Use your analytics, SQL, and data visualization skills to help Bright Coffee Shop understand:

- Which products generate the most revenue
- What time of day the store performs best
- Sales trends across products and time intervals
- Recommendations for improving sales performance

Step 2: Ask Data Driven

Step 3: Analysis Planning

Data Inspection: Checking what Data is available to solve the Business Problem that we have

purchase_date

Analyse daily, weekly and monthly sales trends.

transaction_time_bucket

Identify peak and slow sales periods.

product_detail
